

COLORADO EVAPORATIVE COOLING PROGRAM QUALIFIED EQUIPMENT LIST

The following are lists of evaporative cooling equipment systems that are eligible for rebates from Xcel Energy's Evaporative Cooling Rebate Program. We will only rebate according to the current approved list for the purchase and permanent installation of new equipment. Mobile cooling units, or those installed using caster/wheel leggings, will not qualify. Please contact the Evaporative Cooling Residential Marketing Assistant if you know of any qualifying equipment that should be added to our list. These lists are subject to change.

PREMIUM/WHOLE HOUSE SYSTEMS

To qualify for a Premium System rebate, equipment must be new and have a media saturation effectiveness of 85% or higher, with remote thermostat control and periodic purge water control. Whole House System rebates must also include a minimum of three supply ducts.

*Indicates character(s) within the model number that reflect minor model changes that do not affect the basic design/performance criteria. The character(s) represent a range of model numbers.

GP+ indicates that system includes the required Green Pak bundle thermostat and periodic water purge controls.

STANDARD EQUIPMENT

To qualify for a Standard System rebate, equipment must be new and have a minimum Industry Standard Rated (ISR) airflow of 2,500 CFM. It must be permanently installed. It can be direct or indirect, and one or two-stage evaporative cooling unit.
